

## SCIENTIFIC BIOGRAPHY

1. This document should contain a description of the candidate's important scientific contributions to his/her field of research, of his/her important publications in this field, and an indication of future plans. In the non-experimental sciences, the biography will contain a separate paragraph relating to the relative contribution of the candidate to publications in which he/she is not the sole author. In the experimental sciences, this information will find expression in the information provided by the candidate in sec. 5(c) of the section relating to List of Publications.
2. **The scientific biography should not exceed three pages.**
3. As a rule, the scientific biography will be written in English.
